For being so very few, they cannot sensibly detract from the reputation of an author, who is even characterized by the number of profound truths in his writings, which will stand the severest analysis; and yet few as they are, they are exactly those passages which his blind admirers would be most likely, and best able, to imitate. Based on actual observed survey inputs, the energy balance for a hypothetical case of percent biomass power would be large, in excess of 50 units of energy produced for every 1 unit of energy expended.
